UD TRUCKS
My UD Fleet

Introducing the new UD Connected Services — the all-in-one smart logistics platform that will drive your business further. As a next-generation successor to UD Telematics Services, UD Connected Services offers you: extensive fleet management, better logistical efficiency, and industry-leading vehicle connectivity.

My UD Fleet is your gateway to UD Connected services. Share, analyze, and store valuable data for your business optimization. The newly improved My UD Fleet platform is more powerful — enabling fleet managers to operate with greater efficiency.

Sustainability

Use powerful data-driven solutions to raise your fleet's fuel efficiency and champion long-term sustainability. Leverage Eco Coach and fuel efficiency reports to optimize driving performance and reduce fuel usage.

- Practice sustainable fuel management with a bird's-eye view of your fleet's fuel efficiency.
- Utilize the new Fuel Efficiency report to assess driving performance and scores — useful data for targeted coaching.

Optimized Business

Get ahead of the competition by improving your delivery planning and turnaround times.

Stay on top with proactive alert notifications, vehicle health monitoring, and trip inspection summaries.

- Map out virtual boundaries and observe speed limits with Geofencing. Receive alerts when a vehicle deviates off route.
- Stay on top of faults and corrective plans — with vehicle health alerts via UD Connected Services.
- Protect your fleet with the new fuel level change report and visualize the location of suspected fuel theft on the map.

Smart Logistics

Track your fleet in real-time, 24 hours a day, 7 days a week. Anticipate road delays, avoid costly trip disruptions, and make contingency plans on-the-fly. Further secure your journey by pre-checking vehicle roadworthiness.

- Monitor your fleet with real-time tracking: live fleet status, location, and most recent events.
- Trace route & event history to aid incident investigations.

Uptime

Achieve better uptime with greater vehicle monitoring, timely alerts, and remote customer assistance. Run your business and drive confidently knowing you can request on-site repairs from UD Road Support — at the push of a button.

- Get notified of vehicle faults and rectify problems quickly.
- Keep an updated service plan by connecting your fleet — and properly coordinate all your workshop visits.

My UD Fleet Made for fleet managers

With major design improvements over UD Telematics, My UD Fleet offers users a brand new experience in the fleet management journey. Navigation is now more user-friendly and the platform has been enhanced with powerful tools designed to propel your business further.

Better control over your business
Receive mission critical information about your fleet and track the status of your deliveries.

Essential fuel optimization
Achieve greater cost savings with insights from comprehensive fuel & trip reports.

Fleet uptime management
Optimize vehicle servicing schedules and monitor fleet utilization.

Real-time truck location
Monitor the health and position of each truck in your fleet in real-time.

Some images in this brochure are specially created with computer graphics for brochure use: They may vary in comparison to the specifications or colors of actual vehicle models. When an option is attached, a vehicle weight may change. For details on each vehicle, please contact your local UD Trucks dealer. The specifications and other information in this brochure are subject to change without prior notice. (This brochure is up-to-date as of May 2023).

UD Trucks manufactures standard vehicles which do not include technical modifications on the truck chassis to comply with the rules imposed by international conventions, relevant national legislation, and transport standards for specific purposes such as hazardous substance transport. Any such modification needs to be done by bodybuilders or customers, and in no event shall UD Trucks be made liable for any liability, loss, injury or risk which is incurred or suffered as a result of such use of the vehicle.
